

- \* A **zoo** with 12 species of lemurs of which 5 roaming around freely, radiated tortoises, chameleons, boas and black parrots ! The zoo functions as a shelter for abandoned pets lemurs, orphans from bush meat hunting and confiscated animals. In addition the zoo also prioritizes breeding of the most endangered species;
- \* If you are interested in learning more on the animal and plant biodiversity of Madagascar, the different environmental problems and the projects and activities carried out by Madagascar Fauna Group, visit the **Environmental Education Centre**. Each Saturday, Parc Ivoloina offers classes in french, mathematics and environmental education to 100 students from primary schools around the park in order to better prepare them for the final exam before continuing on to secondary school.
- \* To discover our hidden treasures in the **Forestry Station**, choose one of our **walks** on the indicated trails for all level of hikers. Enjoy the freshness of our waterfall, go up to our panoramic viewpoint and explore the old ruins of Santa Leon. You can take a break at the different picnic places at several sites in the forest.
- \* Visit our **Tree Nursery** full of native plant species. Have a look also at **Agricultural Model Station** to explore the typical fruit trees from the east coast, to discover our medicinal plant garden and to have a look at composting process as well as other sustainable agricultural techniques.
- \* Before going home, take a break at our **Buvette** to have a drink and to buy some typical malagasy souvenirs made by local artisans. The benefits of our buvette allow us to renovate and ensure good maintenance of our Park, as well as support several of our conservation activities.
- \* The **ICTC (Ivoloina Conservation Training Center)** is a nice complex in the middle of the Parc designed to welcome larger groups for trainings, meetings, parties, and other events. A conference room, refectory, kitchen, dormitory are open for all ! Tents and camp sites are also available for organizing an extended nature visit.
- \* For those who want to learn more about microscopy, conduct water and soil analyses, consult our reference collections or create even your own herbarium visit our **Laboratory at the ICTC**.
